Make Sure Every Nurse Knows **Your Protocols**

Karibu turns your policies and procedures into pre-shift orientation and on-shift answers, available to your nurses by voice or text on any device

“We have a binder at the nurses station with all our policies. They sign off that they read it. But are they actually reading it, or just signing that they acknowledge?”

DON, LTC FACILITY, MISSOURI

HOW IT WORKS

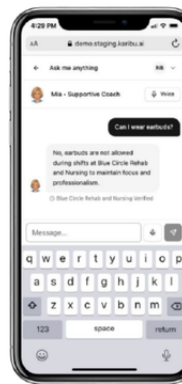

WHEN NURSES START, WHEN PROTOCOLS CHANGE

A 5-minute orientation, pulled from your SOPs.

A personalized microlearning gets pushed to the nurse before their first shift, or whenever you update a policy.

Track completion, not just attendance.

ON EVERY SHIFT, AT THE BEDSIDE

Ask Me Anything (AMA), by voice or text.

Nurses can ask any clinical or facility question and get an instant answer, grounded in your policies and procedures.

Answers at the bedside, not at the binder.

Fewer after-hours pages

Routine protocol questions get answered without you.

We launch on your floor

Not over Zoom. We come to your facility, walk it with you, and stay on-call.

Survey readiness

Protocols followed because they're easy to find, with a record of who reviewed what.

Validated learning, not reads

When protocols change, track completion, not just attendance.

Discontinue at no cost if metrics don't improve.

We track documentation accuracy and orientation time with your DON, reviewed together at the end of week 2 and week 4.

- ✓ **Pilot Offering:** no setup fee, your first month free
- ✓ **We come to you:** on-site setup, soft launch first so nurses are never blocked while we tune
- ✓ **Survey-ready:** your facility is live before your next inspection cycle

HOW TO GET THIS APPROVED TODAY

Most DONs we work with forward this 3-line email to their administrator:

“Found a tool that takes our SOPs and gives our nurses pre-shift orientation and on-shift Q&A on their phone. On-site setup, free for the first month, and they only stay if the metrics improve. Okay if I set up a demo?”

Nathalie Brochstein, CEO
